This is a short game, but even so, the missions are very repetitive. Even worse, the missions aren't challenging in the least. Since the troops are weak and the whole village thing has a cap for every building type, you just end up spamming your god powers until the AI is beaten into submission. With the limited amount of powers, it get very old very fast.. A cute game with fun mechanics. I'm usually not one for arcade style games, but this one has been enjoyable so far, going through the campaign. For me, it was worth the price, and I plan on playing this whenever I just want to relax for a few minutes.. Short, but definitely worth checking out. Took me 30 minutes to get 5 endings, of which 3 were different (Sly, Fallen Hero, Innocent).

It's like a *"Choose Your Own Adventure"* book, except with good music and visuals!

Loved the smoothness of the narrative - no matter what choices you make, whatever follows fits perfectly.. Wow soooooooooooooo Good!

Any fan of the Bard needs to play this!. 5-7 \$, а потом бац, и она фри ту плэй. Обидно однако. А сама игра шедевр, но жалко онлайн маленький. Если бы людей побольше было б, тогда вапще ♥♥♥♥♥ь.. Best of luck to you!
- A fellow gamedev.. Interesting game if you like to learn about the history of the Roman empire. 10/10 cheated in solitaire

I've been following this game for a while and I cannot say enough how much I love this game. The game looks absolutely amazing. The map design is incredible. Every map has it's own unique personality and they're all easily recognizable. All of the guns feel really nice and work very well. The one thing that really upsets me about this game is the lack of people playing it. And with the lack of people playing it there is not the biggest incentive for them to put man hours into adding more content to the game. I'm just hoping in the future when the console ports are released that this game gets the attention it deserves. Please get this game!. This game is currently on sale for 79p but I would say it's worth it at the full price of £1.59. An excellent on-rails shooter.. You know, I've played this game two times, putting in just over 30 minutes.

And I can honestly say I don't want to keep playing this game. It's just not very interesting. The game play loop is basically choose similar colors, and the first level is 2 colors and a wild. But there's no "pleasure" from making a chain. And there's a high (unchangeable) difficulty.

Can someone enjoy the game... maybe but there's SO many of these music games out there that this no longer is needed. Go grab Amplitude, or something like that, but I think it's safe to just ignore this one.. Considering this only has one dev its surprisingly good! The scary atmosphere is done perfectly just a little disappointed at the length but for the price I cant really complain.. First impressions: for a game that costs 6 dollars and has some voice acting. Yea, it is pretty decent.

Voice acting is ok, not super high quality.

Art is good, but it won't make the game.

Background music and art is generic. It is like slide-show presentation quality.

Text, well, decent and easy to read. Just minor pet peeves with the immersion breakers.

For VN standards this is ok in my books, but this could have been worse.

Pacing with the text and voice acting is great. I would have dropped this game instant if it would only have been "only text with pretty art". I think every girl has good voice actress, but you can clearly hear that some of their dialogue are recorded in basement or in their rooms.

Girls design look something I would want to see more of, they are simple and easy to recognize. I think that was most where they put effort on and that shows.

My own biggest problem is those "-san, -kun, -chan" ends. It does not work in ENGLISH! Out of context it makes characters sounds like biggest anime fans they can be, but in story they don't show any slight interest in anime. It would be ok if they spoke like normal humans and not japanese wannabes. It breaks the flow, when someone adds it. I really love these voice actresses, but when they forcefully add that "-kun" or "-san" I cringe little inside.

Because do you think normal people in america add those? Make dialogue more fluid and human. Like if they would actual say something to each other.

Overall I think I this review more towards to devs and actual bame buyer, but hey.

To you, who are thinking, should you buy this game?

Yes: If it is on sale under 4 dollars, it is worth that much. You are pretty much paying for audio book than VN. Or you like VN with voice acting and want to support devs to challenge themselves to make a more grandier game with better quality and spot fixing these little "things".

No: If you don't like that anime style, like, this whole game is very unoriginal. Idea is great, but like, if you want to just enjoy VN with like actually believable story, skip this. Not worth of your money. You would rather watch Anime or play something else.

BUT, would I recommend this game to someone. YES. As a study game. Let them see, how you can make a decent game that is enjoyable to play, but has too many minor nitpicks that crushes your suspension of disbelief. But I hope, if devs gets something out of this and makes a improved game in the future. I would be happy.

. I love 9dragons ever since it was owned by Acclaim. It still holds true but now im experiencing alot more problems with the launcher and startup and from what i've found in my research i can't find any way to fix it without a workaround (which i dont have time for) or disabling antivirus software (of which i have none besides windows defender). In all honesty i'd be playing this

game so much more if it werent for these problems that couple easily be fixed and seems, from my research, that redfox is just lazy and patches the 9dragons launcher in a stupid manner. It seems as though they don't really care for the game nor the community that invests multiple hundred hours enjoying said game. I will still recommend this game if you can get past some stupid bugs with the launcher that many people have had in the past.
